

# EU imports of organic agri-food products

## Key developments in 2019

### Contents

1. Organic imports
2. Origin and destination of organic imports
3. Key imported organic products
4. Imports of organic cereals, oilseeds and sugar and derived products
5. Imports of organic fruit and vegetables
6. Imports of organic permanent crops (excluding fruit and nuts)
7. Imports of organic animal products

While the EU market of organic agri-food products continues its growth, organic imports remained stable between 2018 and 2019. Looking more in detail into import categories, some shift occurred: a decrease in imports of organic cereals (including rice) and oilseeds (excluding soyabeans) was counterbalanced by increased imports of tropical fruit, oilcakes, soyabeans and sugar. Changes were also observed in the ranking of the main trading partners with Colombia and Kazakhstan entering the top ten suppliers of organic products to the EU. The main importing EU Member States in 2019 were the Netherlands, the United Kingdom and Germany.

The present brief describes EU28 data on EU imports of agri-food products in 2019 and reflects on key developments compared to 2018. It characterises these imports in terms of origin and destination, as well as product categories.

EU Agricultural Market Briefs are available on Europa:

[https://ec.europa.eu/info/food-farming-fisheries/farming/facts-and-figures/performance-agricultural-policy/studies-and-reports/market-analyses-and-briefs\\_en](https://ec.europa.eu/info/food-farming-fisheries/farming/facts-and-figures/performance-agricultural-policy/studies-and-reports/market-analyses-and-briefs_en)

## 1. Organic imports

### Stable import volumes of organic products

In 2019, the EU imported 3.24 million t of organic agri-food products. This represents a negligible increase compared to the 3.23 million t imported in 2018 (+0.4 %).

Commodities represented 54 % of 2019 imports, a slight decrease compared to the previous year. The share of imports of other primary products increased to 38 %.

<sup>1</sup> Classes in this brief are defined in the monthly sheet published by DG AGRI to monitor the EU trade of agri-food products. "Commodities" includes, among others: cereals, vegetable oils and oilseeds, sugars, milk powders and butter, unroasted coffee and

### Higher estimated unitary value of imported organic products

#### Box 1: Estimating the value of organic imports

Data on import volumes of organic products is made available in Traces (TRAdE Control and Expert System)<sup>2</sup>. In the absence of primary data on unit values for organic imports in Traces, estimates have been made using prices for total trade volumes of the same 6 classes and 68 agri-food product categories based on data from Comext.

The unitary value of commodities is comparatively lower than for other agri-food products. As a result, while they represent 54 % of 2019 organic imports in volume, their share is 38 % in value. Other primary products are estimated to account for 43 % of value of organic imports, compared to 38 % in volume. Processed products and food preparations have a much higher unitary value and represent 15 % of total value (respectively 11 % and 5 %), which is more than double their share in volume terms (7 %).

**FIGURE 2 – Share (%) of total agri-food imports in value by class, 2019**

Source: Traces

cocoa. "Other primary" includes: meat products, F&V, milk yoghurt and honey. "Processed" includes: cheese, meat preparations, wine and fruit juices. "Food preparations" includes: infant food, confectionary and pasta. "Beverages" includes: beers, spirits and soft drinks, while "non-edible" covers: plants and essential oils. Moreover, in its scope, the organic regulation covers also products of the fishery sector, which are reported under the label "non agri".

<sup>2</sup> Traces is the European Commission's online management tool hosting the sanitary certificates requested on intra-EU trade and importation of animals, food, feed and plants.

## 2. Origin and destination of organic imports

### Large volume share of organic products enters the EU through the Netherlands

Almost one third of 2019 organic imports into the EU are imported by the Netherlands (32 %). Other important importing EU Member States of organic products include Germany (13 %), the UK (12 %) and Belgium (11 %). Organic imports in Member States which joined the EU after 2004 remain minor at slightly above 3 %.

**FIGURE 3 – Organic agri-food import volumes by import country (million t)**

Source: Traces

### Main trade partners for organic imports include China, Ukraine, Dominican Republic and Ecuador

The ten largest export countries of organic products to the EU represent 70 % of imports in 2019.

**FIGURE 4 – Share (%) of total organic agri-food import volumes by export country, 2018 (inner circle) and 2019 (outer circle)**

Source: Traces

Together, these ten countries increased their exports to the EU substantially by 13 %. In comparison with 2018, the United States and the United Arab Emirates lost their ranking in the top ten and are replaced by Colombia and Kazakhstan.

Imports from China include mainly organic oilcakes (75 %), while Ecuador, Dominican Republic and Peru supply the EU with organic tropical fruit, nuts and spices. Organic cereals (including wheat, excluding rice) is the main imported product from Ukraine, Turkey and Kazakhstan, and organic sugar the number one from Brazil and Colombia.

**FIGURE 5 – Main product categories of organic agri-food imports by exporting country, 2019 (million t)**

Source: Traces

## 3. Key imported organic products

### Tropical fruit still on top of imported products

The ten most imported product categories represent 82 % of total organic import volumes in 2019. First come tropical fruit, nuts and spices with 27 % (0.9 million t), followed by oilcakes with 12 % (0.4 million t), followed by cereals other than wheat and rice and by beet and cane sugar (both 7 %, 0.2 million t).

Compared to 2018 organic imports, a significant increase is observed in the volume imported of tropical fruit, nuts and spices (+13 %), oilcakes (+13 %), sugar (+29 %), vegetables (+8 %), unroasted coffee, tea and maté (+11 %) and soyabeans (+25 %). Also, for the first time in 2019, a very small volume of organic cheese was imported (1.2 t).

Remaining top-ten product categories decreased compared to the previous year: cereals other than wheat and rice (-8 %), wheat (-16 %), oilseeds other than soyabeans (-17 %), fruit other than citrus or tropical fruit (-8 %). Volume imported of organic rice, which was in the top-ten organic products imported in 2018, decreased very sharply by 67 % in 2019.

(0.07 million t in 2019, compared to 0.22 million t the year before), due to the absence of organic rice imports from the United States in 2019.

**FIGURE 6 – Share (%) of total organic agri-food import volumes by product category, 2018 (inner circle) and 2019 (outer circle)**

Source: Traces

#### Almost one fifth of imported olive oil estimated to be organic

For some of the products categories, organic imports are estimated to represent a significant share of total imports. In particular for olive oil, almost 20 % of imports are estimated to be organic. For the other product categories, organic imports represent up to a maximum of 10 % of total imports, and for the large majority less than 5 %. Overall, organic agri-food imports are estimated to represent about 2 % of total volume of agri-food imports.

**FIGURE 7 – Estimated share (%) of selected organic agri-food import volumes out of total (organic and conventional) imports by product category**

Source: Traces and Comext

#### 4. Imports of organic cereals, oilseeds and sugar and derived products<sup>3</sup>

Close to half of the imported organic products pertain to the arable crop product categories or to their derivatives (45 % or 1.5 million t). Of these, oilseeds, oilcakes and vegetable oils cover slightly above 0.7 million t (50 %), with the largest category being oilcakes (of which 92 % of soybean meals). Oilcakes are an important feed component for EU livestock production, in particular for organic pigmeat and poultry meat. A further 0.5 million t is composed of cereals and flours (36 %), mainly wheat and maize. The remaining 0.2 million t is sugar (15 %).

Imports of organic oilseeds and derivative products increased on average by 6 % in 2019. Amongst these product categories, only imports of oilseeds other than soyabeans decreased compared to 2018. For cereals (including wheat and rice), organic imports show a decline over all product categories, resulting in an average decrease in 2019 imports of 28 %. With regard to sugar, an additional volume of 29 % was imported.

**TABLE 4 – Organic cereals, oilseeds and sugar import volumes for key product categories, 2018 and 2019 (thousand t)**

	2018 imports	2019 imports	Change (%)
Oilcakes	342	386	13.0
<i>of which soybean meals</i>	305	357	16.5
Cereals, other than wheat and rice	254	233	-8.3
<i>of which maize</i>	224	208	-7.3
Beet and cane sugar	166	214	28.9
Wheat	242	204	-15.7
Oilseeds, other than soyabeans	193	160	-16.8
<i>of which sunflower</i>	103	58	-43.4
<i>of which linseed</i>	29	27	-5.4
<i>of which rapeseed</i>	17	22	30.9
<i>of which sesamum seed</i>	15	19	23.6
Soyabeans	106	132	24.8
Rice	216	71	-67.4
Palm & palm kernel oils	40	41	2.4

<sup>3</sup> The analysis covers only the largest product categories listed in Table 4. It does not include imports of other organic derived products such as starches, pasta, pastry, biscuits and bread, or ethanol, for which imports remain limited.

	2018 imports	2019 imports	Change (%)
Flours and other products of the milling industry	20	19	-5.0
Vegetable oils other than palm & olive oils	10	13	28.1
<b>Total</b>	<b>1 588</b>	<b>1 472</b>	<b>-7.3</b>

Source: Traces

Over 80 % of organic oilcakes are imported from China. With regard to oilseeds, important origins include China, Ukraine and India, as well as Togo for soyabeans and Turkey for other oilseeds. A vast majority of organic cereals (excluding rice) is imported from Ukraine (32 % of wheat, 77 % of other cereals) and Turkey (22 % of wheat, 11 % of other cereals) as well as from Kazakhstan for wheat (31 %). Pakistan and India are the main origin country of imported organic rice (respectively 36 % and 25 % of total organic rice imports). Three-quarters of organic sugar is imported from four countries: Brazil (27 %), Colombia, India (both 18 %) and Paraguay (14 %).

**FIGURE 8 – Organic cereals, oilseeds and sugar import volumes by exporting country, 2019 (million t)**

Source: Traces

## 5. Imports of organic fruit and vegetables

Fruit and vegetables is the second largest group of imported organic product categories, with 1.35 million t imported in 2019 (42 % of total organic imports). The largest share is composed by tropical fruit, nuts and spices (66 %) which include mainly bananas (85 % of tropical fruit).

Imports of organic fruit and vegetables increased by 8 % in 2019. A particularly strong increase is observed in imports of tropical fruit, nuts and spices, with 2019 imports close to 0.9 million t (+13 %). Two

categories show however a decrease compared to the previous year: fruit other than exotic and citrus fruit (-8 %) and fruit juices (-3 %).

**TABLE 2 - Organic fruit and vegetables import volumes by product category, 2018 and 2019 (thousand t)**

	2018 imports	2019 imports	Change (%)
Tropical fruit, fresh or dried, nuts and spices	785	886	12.8
<i>of which bananas</i>	654	749	14.6
Vegetables, fresh, chilled and dried	147	159	7.9
<i>of which dried leguminous</i>	58	58	1.3
<i>of which potatoes</i>	33	28	-16.1
<i>of which onions, shallots and garlic</i>	13	27	115.5
Fruit, fresh or dried, excl. citrus & tropical fruit	146	134	-8.5
<i>of which apples and pears</i>	59	38	-36.3
<i>of which grapes</i>	20	22	11.0
Fruit juices	89	87	-2.8
<i>of which orange juice</i>	32	30	-4.6
<i>of which apple juice</i>	30	24	-20.1
Preparations of vegetables, fruit or nuts	55	57	3.9
<i>of which preparations of fruit</i>	50	51	1.0
Citrus fruit	29	30	2.7
<i>of which lemons</i>	16	16	5.9
<i>of which oranges</i>	8	7	-4.3
<b>Total</b>	<b>1 252</b>	<b>1 352</b>	<b>8.0</b>

Source: Traces

Organic tropical fruit, nuts and spices are imported mainly from the Dominican Republic (34 % of total, equal to 0.3 million t), Ecuador (31 %) and Peru (15 %). Almost half of the imported organic citrus fruit originate from South Africa (46 %), while other organic fruits come from mainly from Turkey (25 %) and Argentina (17 %). About half of organic fruit juices imported come from Turkey and Mexico (both 25 %). Middle Eastern countries are the main origin of organic vegetables, including Egypt (26 %), Israel (22 %) and Turkey (17 %). For preparations of vegetables, fruit or nuts, none of the origin countries significantly emerges over the others.

**FIGURE 9 – Organic fruit and vegetables import volumes by exporting country, 2019 (million t)**

Source: Traces

## 6. Imports of organic permanent crops (excluding fruit and nuts)

Beside organic fruit and nuts, a further 260 000 t of organic permanent crops (and their derivatives) are imported. This includes in particular unroasted coffee, tea in bulk and maté (54 %), of which 92% is coffee, as well as cocoa beans (25 %). Organic imports under these product categories increased slightly in 2019 compared to 2018 (+3 %). While unroasted coffee, tea in bulk and maté increased with 11 %, imports of cocoa beans showed a similar percentage decrease.

**TABLE 3 - Organic permanent crops (excl. fruit and nuts) import volumes by product category, 2018 and 2019 (thousand t)**

	2018 imports	2019 imports	Change (%)
Unroasted coffee, tea in bulk & maté	127	141	11.1
<i>of which coffee</i>	117	130	11.6
Cocoa beans	74	66	-11.3
Olive oil	30	34	11.6
Wine, vermouth, cider and vinegar	21	20	-5.3
<i>of which wine</i>	19	19	2.3
Roasted coffee and tea	0.8	0.9	13.4
<b>Total</b>	<b>253</b>	<b>262</b>	<b>3.3</b>

Source: Traces

Unroasted coffee is largely imported from Peru and Honduras: together, they represent 58 % of the exporting countries under this category (respectively 32 % and 26 %). Cocoa beans come from the Dominican Republic (37 %), Peru (20 %) and Sierra

Leone (17 %). Tunisia is the sole exporter of organic olive oil to the EU. Chile and Argentina export each about a third of organic wine, vermouth, cider and vinegar to the EU, and further quantities are imported mainly from South Africa and Australia.

**FIGURE 10 – Organic permanent crops (excl. fruit and nuts) import volumes by exporting country, 2019 (thousand t)**

Source: Traces

## 7. Imports of organic animal products

**TABLE 5 - Organic animal product import volumes by product category, 2018 and 2019 (t)**

	2018 imports	2019 imports	Change (%)
Eggs and honey	17 808	18 032	1.3
<i>of which honey</i>	17 693	17 901	2.6
Bovine meat, fresh, chilled and frozen	666	486	-27.1
Non edible animal products	453	233	-48.4
Sheep and goat meat, fresh, chilled and frozen	132	71	-46.3
Cheese	0	1	N.A.
Pork meat, fresh, chilled and frozen	19	0	N.A.
Butter	0.2	0	N.A.
<b>Total</b>	<b>19 079</b>	<b>18 823</b>	<b>-1.3</b>

Source: Traces

Honey is the main imported organic animal product. Imports in 2019 remained stable compared to the previous year around 18 000 t. Beside honey, imports of organic animal products in the EU are negligible and represent together less than 1 000 t in 2019.

China, Mexico and Brazil are the main exporting countries of eggs and honey to the EU. Bovine meat and non-edible animal products are imported mainly from Uruguay. Organic sheep and goat meat originates from New Zealand. The 1 t cheese is imported from the United States.
